Neuter the PetStar Way!

A canine neuter is surgical castration of the male dog. The testicles are removed, therefore preventing reproduction. It can help with behavior modification, although this may not always be the case.

We want to keep your pet as safe and comfortable as possible during and after their surgical experience. Allow us to give you and your pet the “star” treatment!

Canine Neuter $35.00
A canine neuter is surgical removal of the testicles, therefore castrating the dog.

Antibiotics $25.00
Intraoperative antibiotics serve to prevent infection. Anytime an animal goes through surgery, their immune system becomes more vulnerable to infection.
*price may vary by weight

Pain Injection $32.00
A pain injection will help ease pain after surgery. Our pain injections are classified as NSAIDs (non-steroidal anti-inflammatory drug). These drugs are safe for surgical patients.
*price may increase slightly for dogs over 50 lbs

Surgical Monitoring $15.00
Your pet is connected to an ECG machine to monitor heart rate and rhythm throughout surgery. A pulse oximeter also monitors blood oxygen saturation. A technician also closely monitors your pet throughout surgery and in recovery.

Standard Neuter Total $318.90 – 377.95

OPTIONAL SERVICES
(check if yes)

Scrotal Ablation with Laser $85.00
The doctor can remove the scrotum following the castration, so that no excess skin is left. This is generally recommended for older dogs, as the skin of a puppy has more elasticity and will usually correct itself.
*This is strictly for cosmetic purposes

Total for Standard Neuter $318.90 – $377.95

Total of Selected Options $_________

Estimated Total for Visit $_________

1 night boarding pre- OR post-surgery Free ( )
Let us pamper your pet and provide a calm, quiet, and comfortable environment either the night before surgery or the night following surgery.

E-Collar $10-20.00 ( )
An e-collar will prevent your dog from chewing at sutures and/or licking the incision site. If you believe your dog is likely to exhibit these behaviors, you may want us to send an e-collar home with you. We will be more than happy to fit your pet with the appropriate size e-collar, and show you how to put it on your dog if needed.

Home Again Microchip $57.50 ( )
A Home Again Microchip is the best way to provide permanent identification for your pet. The chip is inserted via syringe, and each chip has its own unique number to identify your pet. If your pet ever wonders off and is taken to either a shelter or veterinary clinic, your pet’s number will show up on the microchip scanner and we can much more easily get your pet back home again.

At-Home Pain Management $15.00 – 30.00 ( )
If you would like to ensure that your pet is pain-free following his surgery, we can send home tablet or liquid form of the NSAID drug we use for pain injections.

I have read and understand that I am responsible for the price quoted at the time of service.
